

## C++ Programmig Language - Associate Programmer

### © Copyrights C++ Institute

- CPA – C++ Certified Associate Programmer
  - **\_0 Installing and using your programming environment**
    - \_0.1 Introduction
    - \_0.2 Installing compiler
    - \_0.3 Installing NetBeans
  - **\_1 Introduction to computer programming**
    - \_1.1 Different languages for different purposes
    - \_1.2 Your first program
    - \_1.3 Integer values, integer variables and comments
    - \_1.4 Numbers and their operators
    - \_1.5 Other kind of data: characters
    - \_1.6 Flow control: how to make simple decisions?
    - \_1.7 Connecting with the real world: input and output
  - **\_2 Advanced flow control and data aggregates**
    - \_2.1 If and else – the more powerful conditional instruction
    - \_2.2 More types and when we use them
    - \_2.3 Loops
    - \_2.4 Bool's algebra and computer logic
    - \_2.5 switch - the different face of 'if'
    - \_2.6 Vectors: why do you need them?
    - \_2.7 Initiators - the simple way to set an array
    - \_2.8 Not only ints
    - \_2.9 Arrays of arrays: multidimensional arrays
    - \_2.10 Structures – why do we need them?
    - \_2.11 Declaring and initializing structures
  - **\_3 Extending the expressive power: pointers, functions and memory**
    - \_3.1 Pointers: another kind of data in the "C++" language
    - \_3.2 Pointers vs arrays: similarities and differences
    - \_3.3 Functions – why?
    - \_3.4 Declaring and defining functions
    - \_3.5 Transferring data to and from functions
    - \_3.6 Default parameters
    - \_3.7 Inline functions
    - \_3.8 Overloaded functions

- \_3.9 Sorting
- \_3.10 Memory on demand
- **\_4 Accessing different kind of data**
  - \_4.1 Arrays of pointers as multidimensional arrays
  - \_4.2 Conversions
  - \_4.3 Strings – the basics
  - \_4.4 Strings – continued
  - \_4.5 Strings – temporary summation
  - \_4.6 Name spaces
- **\_5 Object programming essentials**
  - \_5.1 Basic concepts of object programming
  - \_5.2 A stack: a view from two different perspectives
  - \_5.3 Anatomy of the class
  - \_5.4 Static components
  - \_5.5 Objects vs. pointers and objects inside the objects
- **\_6 Inheritance**
  - \_6.1 Defining class hierarchy
  - \_6.2 Classes, inheritance and type compatibility
  - \_6.3 Polymorphism and virtual methods
  - \_6.4 Objects as parameters and dynamic casting
  - \_6.5 Various supplements
  - \_6.6 The const keyword
  - \_6.7 Friendship in the “C++” world.
- **\_7 Exceptions**
  - \_7.1 To err is human
  - \_7.2 Throw statement in detail
  - \_7.3 Categorizing exceptions
  - \_7.4 Catching exceptions
  - \_7.5 Exceptions in action
- **\_8 Operators and enumerated types**
  - \_8.1 Overloading operators – the basics
  - \_8.2 Enumerated types
  - \_8.3.Overloaded operators in detail
  - \_8.4 Overloaded operators in detail (continued)
